New Spark Plug after 10,000kms in engine without Doring Fuel Cat

New Spark Plug after 10,000kms in engine with Doring Fuel Cat

As you can see the Doring Fuel Cat cleans the internals of your engine.

Photograph of Fungal Growth in Fuel

The brown ring in the left hand jar is dead fungal growth 6 weeks after introduction of our fuel catalyst.

The brown ring in the middle jar is dead fungal growth 6 hours after introduction of our fuel catalyst.

The right hand jar is identical fuel without our catalyst and the fungal growth is active.

Note the different colours of the fuel.
